Drinkware

People with restricted mobility also require handsome-looking, comfortable drinking utensils. Our tumblers are available with one or two handles, in all sizes and colours. We also provide drinking cups with lids. You have a choice between thinner or wider drinking holes. Featuring a nose cutout, our special design helps to offer more drinking comfort to bedridden patients.

Plates and covers

Help people with restricted mobility to continue eating as independently as possible. These raised-edge, unbreakable polycarbonate plates make it easy for everyone to use their eating utensils. The non-slip coating keeps the plate in place and the matching lid keeps the food fresh and piping hot. You have three different colours to choose from.

Assisted dining plate

Our high quality assisted dining plate has a high rim, making it easier to scoop food onto cutlery. The integrated friction plate holds the plate in place, and the bright colours makes it ideal for anyone with cognitive, motor or physical impairments. The plate is suitable for any type of dish, from soup to dessert.
